

SMART MAGNETIC PAINT

APPLICATION GUIDE

HOW TO APPLY SMART MAGNETIC PAINT

To apply Smart Magnetic Paint correctly, please follow the instructions below.

1 MEASURE YOUR AREA

- Measure the area accurately ensuring you have enough paint.

2 PREPARE THE SURFACE

- Check and fill any holes or cracks in the surface with a normal decorator's filler. Once the filler is dry, sand the surface to ensure it is smooth and remove any dust.

3 HOW TO APPLY MAGNETIC PAINT

- We recommend 3 coats of Smart Magnetic Paint. You can apply extra coats to increase the magnetic performance (no more than 7).
- Stir the magnetic paint before use.
- Apply a generous even coat of Smart Magnetic Paint to the surface leaving a smooth finish.
- Once the first coat is dry (after approx. 2 hours), lightly sand the surface with 1200 grade sandpaper.
- Remove any surface dust with a dry brush or cloth.
- Apply a generous even second coat of Smart Magnetic Paint. Allow to dry and sand lightly.
- Repeat the process until you have applied your desired number of coats.

Top tip:

You can add a final layer of magnetic paint by using a straight metal edge to skim the product across the top of the surface to create a highly smooth finish.

4 MAGNETS

- Use **Smart Neo-Magnets** or other neodymium magnets with your Smarter Surface.

Note:

Ordinary household magnets are not suitable.

ADDITIONAL FINISHING OPTIONS FOR YOUR MAGNETIC SURFACE:

DRY ERASE

Add dry erase functionality to your magnetic surface by choosing **Smart Whiteboard Paint** or **Smart Whiteboard Wallpaper**.

WET ERASE

To add wet erase functionality to your magnetic surface, apply **Smart Blackboard Paint** on top.

COLOUR OF CHOICE

Pick a colour of your choice and apply on the top of your magnetic surface. In addition, you can add a coat of **Smart Whiteboard Paint Clear** for dry erase functionality.
